	1	Social Work with Youth and Young Adults – a German- Russian Comparison		
		Prof. Dr. Dirk Nüsken, Professor of Theory and Practice in Social Work, EvH Bochum		
		Ekaterina Shadrova, PhD in Education, Associate Professor at Volodga State University, Russia		
		Socio-educational work with adolescents and young adults is one of the core elements of social work. In this course, we present current concepts and methods of working with adolescents and young adults from Germany and Russia. Attention will be given to analysing and comparing the challenges involved as well as helpful support strategies that could be engaged. In addition, attention will be given to the question of child protection and social diagnostics with adolescents, as well as the question of "care leavers". Students will be expected to present a case study based on their practical experience, for group discussion.

5	Inclusion Policy - a South African Perspective
	Ingrid Daniels, Director of Cape Mental Health, South Africa
	The Apartheid regime prior to the new democracy in 1994 in South Africa constructed and engineered social, political and economic policies and laws based on racial segregation and discrimination. After 1994, the new democratic government of South Africa, with its Reconstruction and Development Policy, the Constitution of the Republic of South Africa, No.108 of 1996, and Bill of Rights paved the way for the rights of all persons and sought to afford them dignity, equality and inclusion. Despite our challenges and the slow implementation of policies, South Africa remains a country which offers a great example in policy development and laws to facilitate inclusion and to accommodate diversity of all persons from different cultures, religions, gender, disability and race.

6	Human Rights and Disabled Persons – a Disability Studies Perspective on the Right to Health
	Prof. Dr. Theresia Degener, Professor of Law and Disability Studies, EvH Bochum, and Chairperson of the UN Committee on the Rights of Persons with Disabilities
	Dr. Sarah Robinson, Lecturer, University of Suffolk, England
	The United Nations Convention on the Rights of Persons with Disabilities (CRPD) of 2006 is widely known and debated. It seeks to bring about a paradigm change from the medical model of disability to the human rights model of disability. But how this can be achieved is less clear. Human rights theories and Disability Studies perspectives are the cornerstones for a proper understanding of the CRPD. The seminar will introduce these and apply them to the right to health (art. 25) CRPD in particular.
